

Packaging design to create pstxref.dat

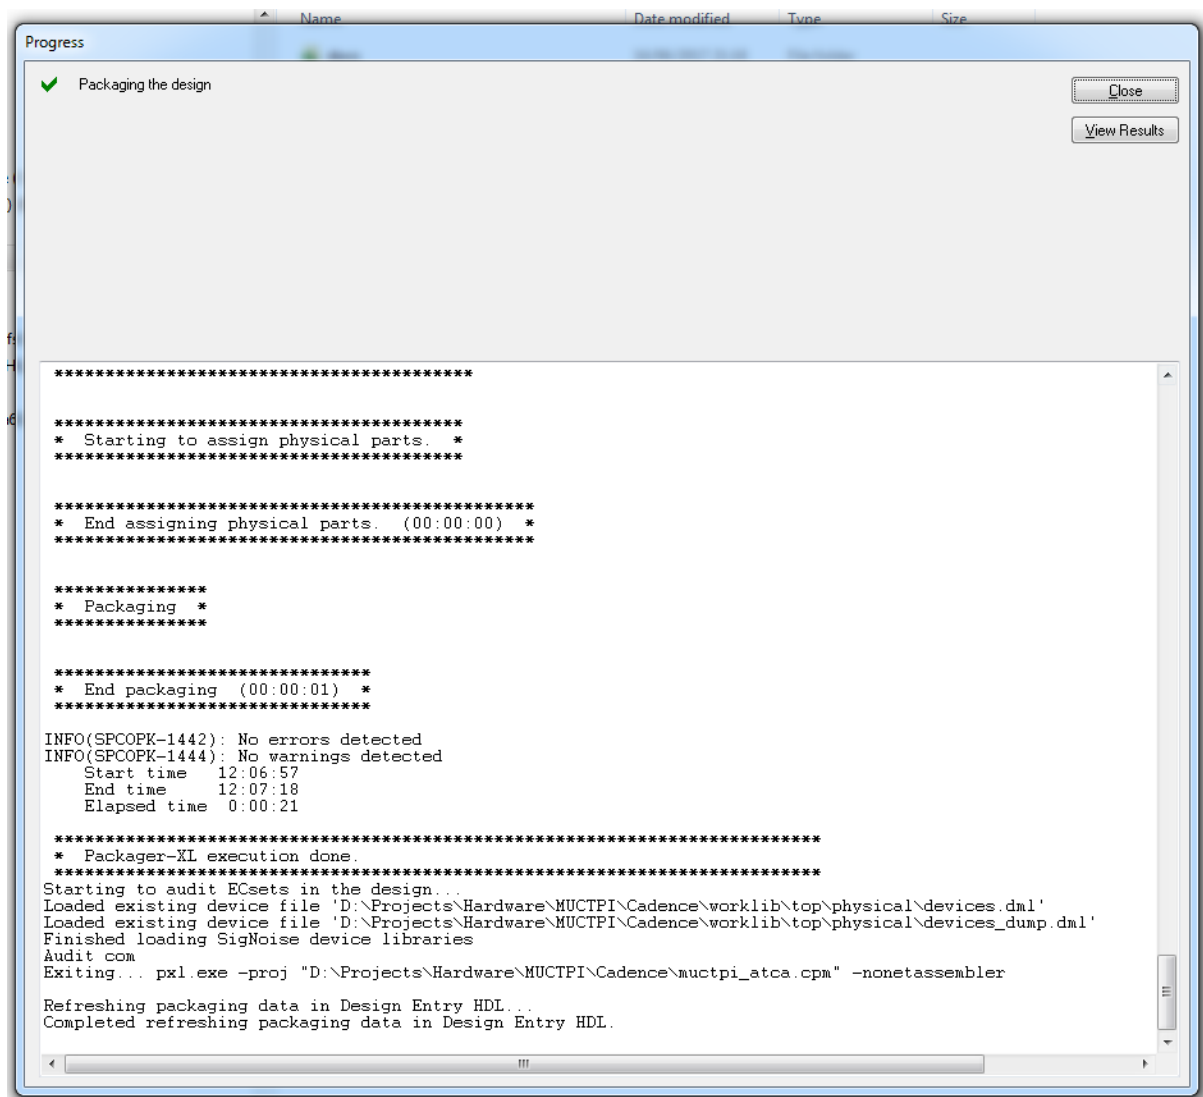

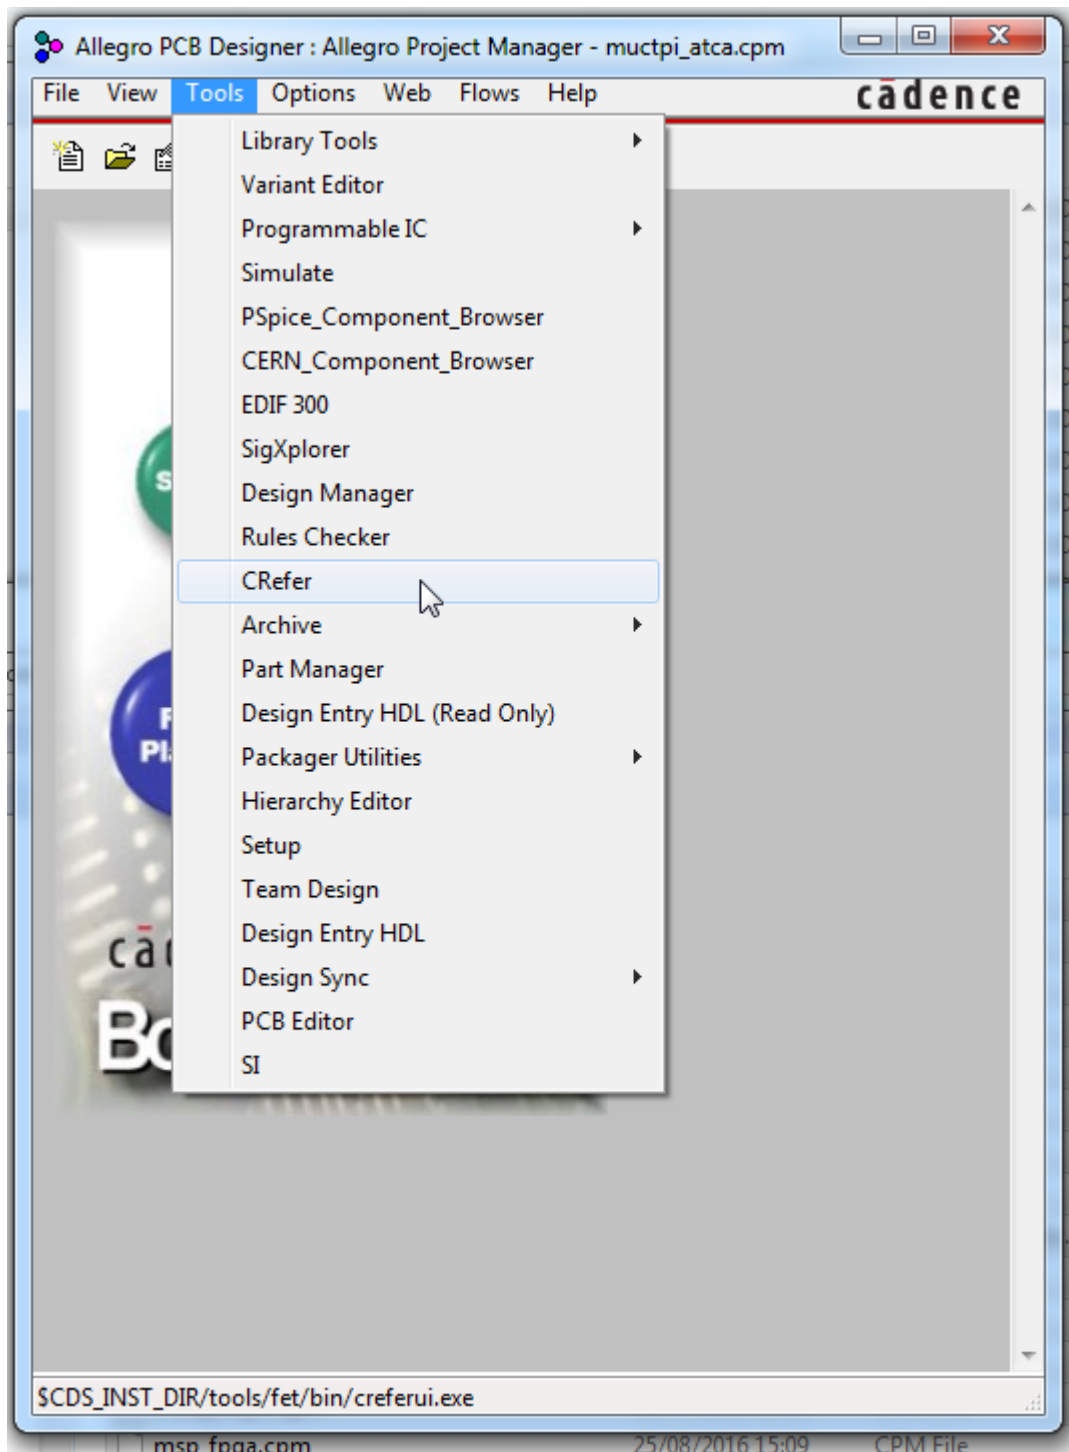

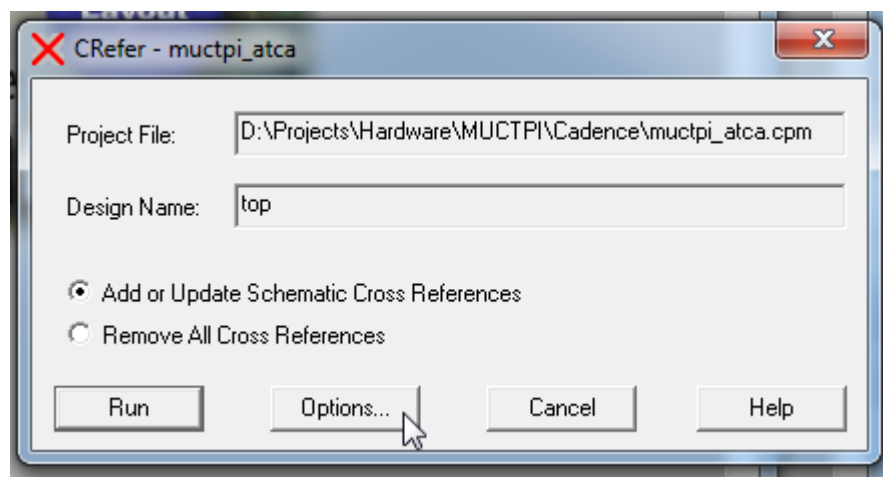

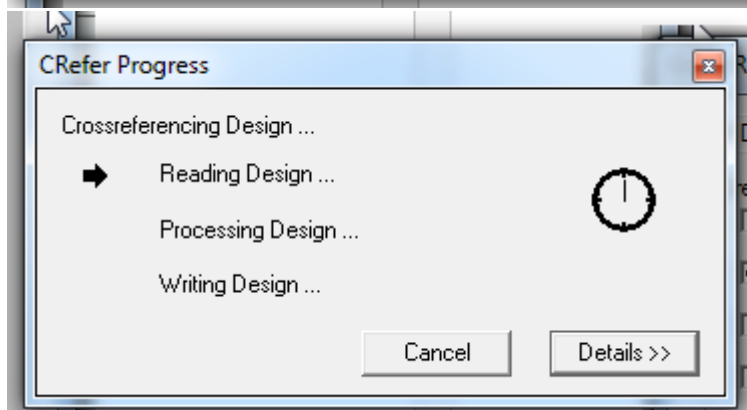

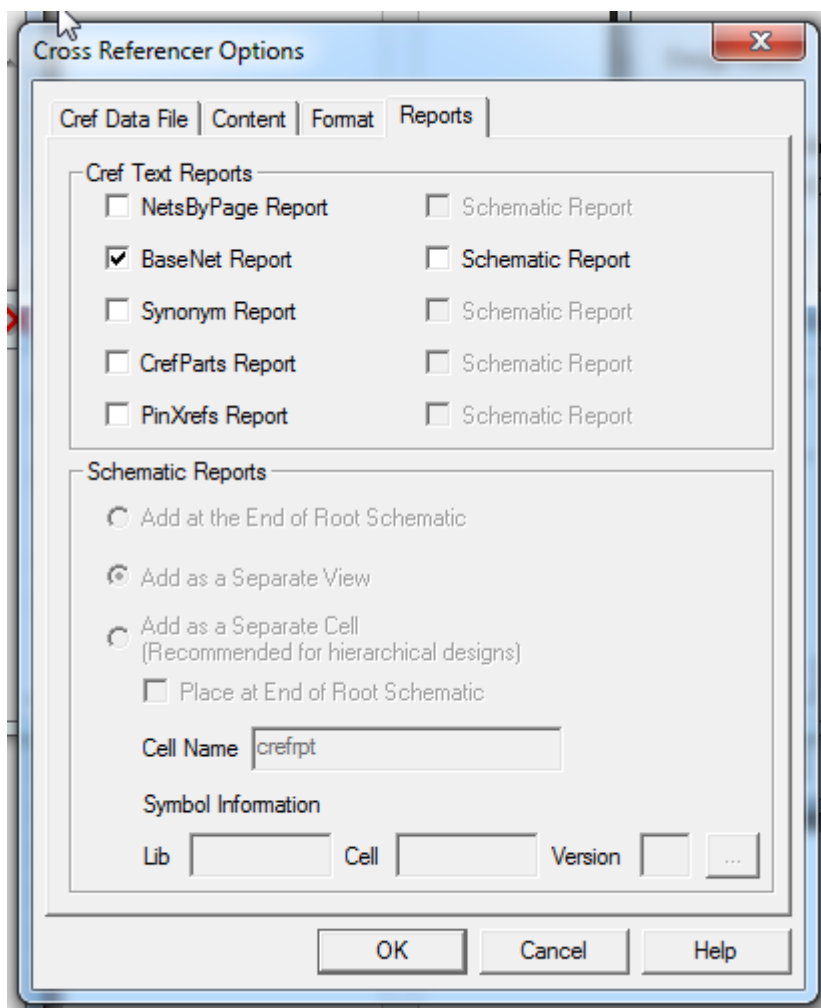

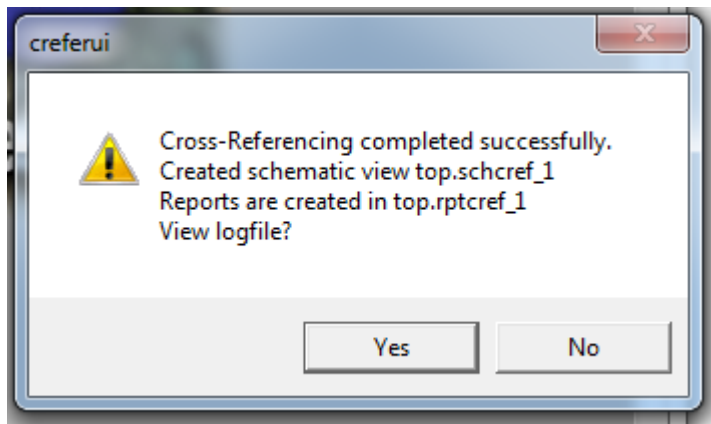

Running CRefer to create basenets.txt

Note: If you find problem such as undefined versions of pages in the local cref.dat file, you can consider to use the installed cref.dat file in \$CONCEPT_INST_DIR/share/local/creferhdl/cref.dat

Look for the following two files: (search expression for both files on windows: basenets.txt OR pstxref.dat)

1. pstxref.dat

If you have an hierarchical design, make sure you get from the top-level worklib folder
